

Three Side Seal Pouch

Features and Benefits:

Entry Level, Versatile Pouch

- The *Three Side Seal Pouch* is a simple, entry level pouch. A low-cost packaging option that provides low gauge, single layer options down to 40 microns. Fully customisable in size and dimensions, this adaptable pouch is suitable for various product types including liquids, dry goods and frozen free flow products. Using pouches to replace other packaging formats such as tin cans provides an opportunity to reduce packaging material by up to 85%. Snell Flexibles is a partner in the **Soft Plastics Recycling Scheme** which means that pouches are now fully recyclable in New Zealand and Australia.

Consumer Appeal

- The *Three Side Seal Pouch* is excellent for multiple use and refill applications. It displays well horizontally so is well-suited for freezer items. The *Three Side Seal Pouch* is re-sealable/reclosable using a wide range of ziplock and velcro closures for convenience and consumer appeal. Suitable for large volume/bulk products up to 10kg

Two Large Printable Faces

- *Three Side Seal Pouches* offer large real estate with printable front and back faces. At Snell Flexibles, we deliver crisp photographic quality imagery through gravure printing.

Customised Construction

- *Three Side Seal Pouches* can be constructed using multiple film/laminate types for customised barrier protection.

Smart Packaging Solutions

One of the original flexible packaging constructions, the *Three Side Seal Pouch* continues to be used as an efficient entry level pack option. This pouch can be filled and sealed from the bottom so that the manufacturer's seal is presented to the customer — making the customer experience of your brand clean and consistent. New technology now has allowed the addition of modern features including zips, laser scoring and easy open options.

Packaging Processes

Three Sided Seal Pouches are suitable for:

- Ambient, Warm, Hot-fill
 - o Ambient fill (up to 60°C), warm fill (60°C-75°C), hot fill (85°C-100°C) and will not deform or leak during and/or after filling.
- Retort
 - o Suitable for plain liquids, semi-solid products at retort processing levels at 121°C for 40 minutes.
- Ambient, Chilled and Freezer Storage Applications
 - o *Three Side Seal Pouches* are suitable for ambient, chilled and frozen products due to the wide range of film structures available. Construction is tailored to end use.

- Modified Packaging Atmosphere
 - o Designed to retain MAP gas as long as possible, the correct barrier laminate construction will keep product in the best possible condition for as long as possible.
- Manuel and Automated Packing Lines
 - o We work to understand customer processes so that we can deliver packaging in a form that fits your automation requirements. Our experienced Flexibles team will help customers optimise their packaging and processes to minimise downtime. We have a wide understanding of all packaging systems, so we can often solve technical problems before they occur.

Packaging Options

- Single ply, two-ply, three-ply, four-ply barrier and non-barrier structures, co-extruded 7, 9 and 11 barrier film structures

Packaging Film Finishes

- Plain, printed up to 10 colours, matt, gloss, matt/gloss highlights, paper
