

Polywoven Bags

Features and Benefits:

Durable

- All Snell Polywoven bags are UV stabilised for greater strength and resistance in all weather conditions and offer unbeatable product protection throughout the supply chain and on-farm. Sizes range from 5kg up to 2000kg.

Customised Construction

- Custom-designed additional features can include LDPE liners, easy open tape, handles (10kg & under), heat welded seams and valves for very fine or dusty materials.

Appealing Finish

- At Snell Flexibles we offer crisp photographic quality imagery through the gravure printing process. Bags can be printed from simple one or two colour options to 10 colours with a range of finishes for the retail market: matt, gloss, matt/gloss highlights and paper.

Smart Packaging Solutions

- Snell Polywoven supplies millions of polypropylene bags to the New Zealand market. Woven polypropylene bags are a versatile, hardy way of packaging a wide range of products including potatoes, stock feed, fertiliser, seed, milk powder, fish products, rendered products, builders mix, mulch and chemicals. Sizes range from 5kg up to 2000kg.

Packaging Film Finishes

- Gloss or matte finish and gravure printed up to 10 colours
